

City Nature Challenge 2022

Seattle-Tacoma Metro Area

Observe Nearby Nature!

Woodland Park Zoo, Point Defiance Zoo & Aquarium, and Northwest Trek Wildlife Park are thrilled to invite you to take part in this global nature observation event! You can help by observing nature, identifying observations, or better yet – both! Look high and low for all nature in the Seattle-Tacoma area (all of Snohomish, King and Pierce counties) and share it with us using iNaturalist!

When: April 29 – May 2 - Observe and report nature
April 29 – May 8 - Identify observations on iNaturalist

How to Participate:

1. Create an iNaturalist account!

With an iNaturalist account, you can upload observations and photos through the iNaturalist mobile app or on your computer through the iNaturalist.org.

2. Observe nature!

Take photos of any living thing you find. This could be a plant, animal, fungi, or any other living thing!

3. Share!

Once you have photos, it's time to upload your observations to iNaturalist. Follow the in-app or web-based instructions to upload and share your observations. Any observations logged during the event will automatically be included in the City Nature Challenge.

4. Help identify!

This step is optional, but is just as important as observing wildlife. Use the app or log on to iNaturalist.org to help others identify the nature that was observed during the challenge.
